

Práctica 2.2.3

Rodrigo Tapiador Cano

1ºDAM
Bases de datos

1. Creación de usuarios:

Creamos los 3 usuarios solo permitidos desde localhost.

```
mysql> create user 'avis'@'localhost';  
Query OK, 0 rows affected (0.02 sec)  
  
mysql> create user 'visor'@'localhost';  
Query OK, 0 rows affected (0.02 sec)  
  
mysql> create user 'gestor'@'localhost';  
Query OK, 0 rows affected (0.02 sec)
```

Una vez creados los usuarios les damos permisos

```
mysql> grant all privileges on alquiler_coches.* to 'avis'@'localhost';  
Query OK, 0 rows affected (0.02 sec)
```

```
mysql> grant select on alquiler_coches.listado_coches to 'visor'@'localhost';  
Query OK, 0 rows affected (0.02 sec)
```

```
mysql> grant select on alquiler_coches.clientes to 'gestor'@'localhost';  
Query OK, 0 rows affected (0.02 sec)  
  
mysql> grant select,insert on alquiler_coches.reservas to 'gestor'@'localhost';  
Query OK, 0 rows affected (0.01 sec)  
  
mysql> grant select on alquiler_coches.listado_reservas to 'gestor'@'localhost';  
Query OK, 0 rows affected (0.02 sec)
```
